PROFESSIONAL EXPERIENCE

Chatterbox Technologies | Front-End Engineer   Pune, India | July 2023 – Present

- I am currently employed as a full-time React Native Developer at Chatterbox Technologies Pvt. Ltd., collaborating with a talented team, where my role centers around driving the development of an edutainment-focused application.
- Developed the new UI of the application and revamped the previous UI as per the requirements along with API integration and major functionalities in the application by increasing the efficiency of the application.
- Majorly worked on rendering the informative video-series, creatively adapting them into a reels format and managing statistical aspects of the app.

Mobiloitte Technologies | React Developer   Pune, India | April 2022 – June 2023

- Project: Developed Social and Crypto combined app.
  - A social networking and crypto wallet combined application that connects people with similar interests.
  - Revamped the entire UI of this application along with its validations based on new design using React Native and Redux.

- o Also connected to the backend by integrating REST-full APIs.
        - o Launched the project live on Google Playstore resulting in over 10,000 + downloads and 4.5 star ratings from users.
    - Project: Crypto-Exchange and Staking platform.
        - o Crypto Exchange application based on Block Chain technology for buying, selling, staking and exchanging/ swapping cryptocurrencies.
        - o Developed the entire UI of this application with required validations.
        - o Also connected to the backend by integrating REST-full APIs.
    - Project: Social Platform for launching NFT.
        - o A social networking platform for launching NFTs including payment gateway.
        - o Extended this application by including additional features and increasing its efficiency using React Native.

GRROOM | Machine Learning Intern   Pune, India | May 2021 – June 2021

- Trained and tested an open-CV (Computer Vision) model that predicts the types of garments to show or recommend similar types to the user. Largely used in the fashion and ecommerce fields.

        - o *VerifyCredential*
